Professional Recumbent Cycle LR-8000 i

Product Description LR-8000 i:

The LR-8000i is both function and aesthetically appealing. Users of all levels will benefit from the new step-thru frame design.

- Extra large LED display presents program graphic, resistance level and figures of pulse, calories, time, distance, which allow users to easily and clearly monitor their workout;
- Simple program buttons allow the user to change programs on the fly;
- Default programs of Manual, Total Body, Auto Pilot, Interval, HRC, Cross-Country, User, and Fit to choose from for your favorite workouts;
- Adopt the technology of self-powered generating system that requires no external power supplies, which is rather energy-saving and safe;
- Low-watt starting workload is ideal for beginning, rehab, or deconditioned users.
- 20 resistance levels to suit user's exercise needs;
- The self-skinned foam saddle offers both maximum durability and comfort;
- A cutaway saddle nose allows users to workout longer without experiencing numbness.
- Exclusive handle bar offers a soft and ergonomic elbow support that provides maximum comfort in the race position;
- Firm base frames for improved stability;
- All molded plastic parts possess outstanding color quality far better than those of paint effect can achieve;
- Durable powder-coating finish on extra-heavy gauge welded steel will look great for years in your facility and it is also easy to clean.
- Max. User Weight: 180 kgs
