- Suspension System: N/A
- Fly Wheel: 21.5 kgs. Fixed Wheel with Ultra Strong Flywheel Axle & Sealed Roller Bearings
- Crank: Hi-Carbon Heat-treated & Forged Steel
- Pedal: Alloy Body & Cage with Toe Clip & Straps
- Locking System: Easy & High Performance “V” Block Tightening & Locking system
- Standard Features: Bottle Cage, Transport Wheels for Easy Moving
- Floor Space: 1035mmL * 640mmW * 1300mmH

- Product Weight: 50.5 KGS
- Max. User Weight: 110 KGS
- Colour: White

Product features

- Frame: 2mm heavy gauge tubing with corrosion (rust) resistant coating delivers a distinctive look and high rust resistance.
- Seat Post: Corrosion resistance seat post allows easy adjustment for fit any size rider.
- Seat Slider: Micro-adjustable fore and aft design with intuitive, easy-to-remember numerical marking provides maximum adjustability for all riders.
- Saddle: Flexible seat base with dual-density padding and anatomical cutout ensure comfort throughout any workout.
- Handlebars: No-slip grip design and water bottle cage offers the ultimate in functionality and convenience.
- Transport Wheels: Non-marking rubber transport wheels make moving and storing the LS-C1W quick and easy.
- Pedals: Alloy body and cage with toe clip and straps-designed specifically for group cycling programs. The compatible, dual-sided platform pedal provides comfort and stability for the casual rider.
- Crank System: Increased size and strength in the bearings, cranks and axel provide dependable performance for every ride.
- Function System: Dual function design for friction and emergency braking
- Locking System: Easy and high performance “V” block tightening and locking system
- Flywheel: 21.5 kgs high tension, fixed wheel with ultra strong axle and Japanese-made high quality sealed roller bearings
